Long time Warragul personality makes the move to Lifestyle Warragul

Pictured are Jackie and Tony Osler who are more than pleased with their move to Lifestyle Warragul.

Local radio personality, Tony Osler and wife Jackie, made the move from their family home to Lifestyle Warragul 12 months ago. After living in the area for more than 70 years, they decided that their family home required too much maintenance and upkeep.

After exploring a number of different options, they decided that Lifestyle Warragul offered them the unique combination that they were looking for: a friendly community, independence, life on their terms and wonderful clubhouse facilities to lead an active lifestyle.

"Last year I had a health scare, so we decided to make the move to Lifestyle Warragul. We have made some wonderful friends, have taken trips and have started new hobbies - it has been great," said Tony.

"Plus my health has improved dramatically, I use all the private clubhouse facilities including the gym every night," he added.

Lifestyle Warragul is located just minutes from Warragul town centre and is set amongst tall trees and beautifully landscaped gardens.

"We are surrounded by the sounds of nature, we can

always hear the birds singing - we feel like we're in the middle of the bush, but we're actually so close to our neighbours and the town centre," said Jackie.

Lifestyle Communities Director, Dael Perlov, explains how Lifestyle Warragul's state of the art clubhouse facilities create a social and friendly community.

"Lifestyle Warragul fosters a close knit community in which new residents quickly make strong friendships. We have bowling tournaments, water aerobics and walking and cycling groups," said Dael Perlov.

"So many of our lifestylers comment that they engage in activities that they never even considered before. Tony and Jackie are just two of the many people that have seen the move to Lifestyle have a positive impact on their lives," he added.

Lifestyle Warragul is located at 134 Warragul-Lardner Road, Warragul.
